## JOHN GEORGE

### Profile

I am a hard working and very ambitious person with a good sense of humor. Technology is truly my passion. Every new day is an opportunity to improve my skills. Whether it be how to improve my programming skills to find that extra performance or learning about a new technology I can utilise in my everyday work. I'm curious by nature and usually don't rest until I grasp a topic fully. I like to help others as well and as such am very comfortable taking on a leading role in projects. As a person I'm very analytical and thorough but also humble. It's not about being right but finding the best way forward.

I have no shortages of hobbies so luckily I seldom get bored. I love watching movies, playing games or reading books. Apart from that I also do spend some time at the gym lifting weights. I also love to travel. Traveling for me really brings out my creative nature and usually helps to put my life into perspective.

### Experience

**Senior Software Developer/Solutions Architect (Contract), KnowIT Experience Malmö AB, Malmö — 2021/08 - Present**

**Technologies: C#, .NET Framework/.NET Core, TypeScript, Azure, SQL, DevOps, Optimizely DXP**

- Part of three teams developing large scale B2B and B2C E-commerce single page application hybrid cloud solutions for TePe AB, JE68 Motorcycles AB, and S:t Eriks AB.
  - Integrated multiple third party solutions such as ERP (Jeeves, DL Prime), payments and logistics solutions like, Klarna Payments, Santander Financing and nShift/Unifaun.
  - Planning, leading and supporting the project teams with for example setting standards for how version control should be properly applied, discussing and setting architecture, planning features and support with software trouble shooting.
  - Upgraded two large scale e-comm solutions from .NET framework to .NET Core.
  - Setup a CI/CD build, release pipelines and deployment groups in Azure DevOps.
-

**Senior Commerce System Developer, Diamir Consulting AB,  
Malmö — 2021/01 - 2021/08**

**Technologies: C#, .NET Framework, JavaScript (jQuery), Azure, SQL, DevOps, Optimizely DXP**

- Part of a team developing backend code for a multi site B2B e-commerce solution for *Carepa/RKV grupper* based on Optimizely Commerce DXP.
- Developed integrations towards ERP (Navision) such as order export and price import. Developed a Svea checkout payment integration. Developed export adapters that would integrate with 13 different ERP systems.
- Setup a CI/CD build and release pipeline in Azure DevOps.
- Developed a high performant multi threaded queue system and queue processor to manage high loads of integration data without compromising application performance.
- Lead and support a team of international developer consultants by suggesting ways of working to improve code standards and best practices based on SOLID principles of OO programming and other best practices to keep a clean and robust code base. Also making sure that good version control practices are being followed.

**IT Consultant, Elicit AB,  
Malmö — 2020/04 - 2021/01**

**Technologies: C#, .NET Core/.NET Core, Azure, Entity Framework**

- Part of a team designing and implementing a gambling engine REST api based on .NET 5 and Entity Framework for RandomState.
- Building a solution with a core engine based on a plugin architecture where new games could be deployed as independent plugins. The reason for this was that as part of gambling regulations binaries needed to be certified and checksummed. So as to not have to certify all binaries for new games we developed the core engine around plugin abstractions.

**Commerce System Developer, Avensia AB,  
Lund — 2017/12 - 2020-04**

**Technologies: C#, .NET framework, TypeScript, Azure, SQL, Optimizely DXP**

- Part of multiple teams as a backend developer developing - B2C E-commerce single page application hybrid cloud solutions for customers like *Polarn o pyret*, *Filippa K* and *Carpe Diem Beds* all based on Optimizely Commerce DXP.
  - Developing a really solid foundation of how to develop high performant, scalable and robust software.
  - Developing integrations for multiple ERP and CRM systems like MS Dynamics 365, Voyado, Setoo, M3.
-

- Working as a backend lead and mentor in Carpe Diem Beds project, to help the backend team with technical support, best practises and way of working according to company standards.

**System Developer, KnowIT Experience Malmö AB,**

**Malmö — 2016/06 - 2017-11**

**Technologies: C#, .NET framework, JavaScript (jQuery), Azure, SQL, Optimizely DXP**

- Part of a small team developing backend code for multiple Optimizely CMS web solutions for Lund municipality.
- Developing intranet based on Optimizely CMS for Folkandvården.
- Developing time booking system for Folkandvården with Bank-ID integration.
- Worked with maintenance for LK Systems Optimizely Commerce and inRiver PIM solution.
- Developed an inRiver print integration with Adobe inDesign for LK Systems.
